Skills

Languages Node.js, Java, React
DevOps Bitbucket Pipeline Deployments, AWS CodePipelines, AWS with Terraform
Frameworks Express with Node.js, React-Native on IOS, Spring with Java

Experience

Full-Stack Software Engineer

Toronto, ON

OLLON

Oct. 2019 - PRESENT

- Successfully executed project by bridging communication gaps between developers and product owners, optimizing development, managing changing deadlines and by identifying and utilizing individuals' strengths within the team
- Optimized and expanding on the feature set of a React-Native application, by streamlining component usage and overall load on the PHP server
- Architected a forms engine with MySQL and Node.js paired with a templated output system built in React for aggregated form results
- Lead developer in creating www.entuitive.com on the PHP WordPress platform; reduced overall development time and project size by 20% by creating a reusable React like modularized framework and working with clients to set expectations and prioritize functionality
- Architected a CMS system featuring multi-user access levels and a React Web App using Node.js Express and MySQL
- Streamlined existing Bash & MySQL ETL scripts reducing processing time by 30% and reported product subscription data with higher accuracy

Front-End Web Developer Intern

Toronto, ON

CASEWARE

Mar. 2018 - Aug. 2018

- Identified an optimization to reduce server requests by 50%, resulting in decreased bandwidth and system load
- Liaised between the User Experience(UX) and front-end development teams, ensuring capabilities and limitations to be mutually understood, resulting in an agile development environment with realistic project scoping and timelines
- Developed AngularJS components for the Smart Engagements Platform, adding consolidation to CaseWare's new keystone software product
- Consolidated an array of User Interface(UI) components into a new dynamic AngularJS component which reduced the overall development and testing time of UI related tasks; by having one component in place of 10 existing ones

Full-Stack Software Engineering Intern

Toronto, ON

JIBESTREAM

May. 2017 - Feb. 2018

- Reconciled the Android, iOS, and Web SDKs, resulting in a reduction of technical support inquiries and strain on cross-platform application developers by ensuring a universal API is implemented across all the SDKs
- Prototyped a fully-automated quality assurance system with Node.js to test the data access and management layers as well as the SDKs to pre-emptively identify bugs, ultimately reducing workload later in the software life cycle
- Communicated technical info at cross-functional meetings in a succinct manner at varying levels of technicality
- Extensive involvement in the development of a Microsoft Graph integration with the existing Android, iOS, and web platforms providing navigation to meeting rooms and in-app room booking to increase versatility with Office 365

Education

B Eng. Software Engineering

Hamilton, ON

McMASTER UNIVERSITY

Sep 2014 - Jul 2019

- Machine Learning Course: supervised and unsupervised models utilizing both types to create better models

PROJECTS & COMPETITIONS

First Place - Precision Agriculture System

Hamilton, ON

McMASTER CUMULATIVE CAPSTONE PROJECT

Sep 2018 - Apr 2019

- Developed a competitive low cost product prototype to optimize farm resource usage, aiming to maximize yields by delivering useful field statistics and resource recommendations leveraging machine learning; Collecting sensor data using python3 on Linux, processed on a Java Spring Server; then presented via a responsive React Web App
